

THREE QUICK GRAPHICAL STUDIES OF SAN FRANCISCO PRECINCT VOTING PATTERNS USING THE NEW PROGRESSIVE VOTING INDEX (PVI) SCORES

by

Rich DeLeon

September 9, 2006

STUDY #1: Precinct PVI scores as predictors of the November 2004 vote for **George Bush** and **John Kerry** for President.

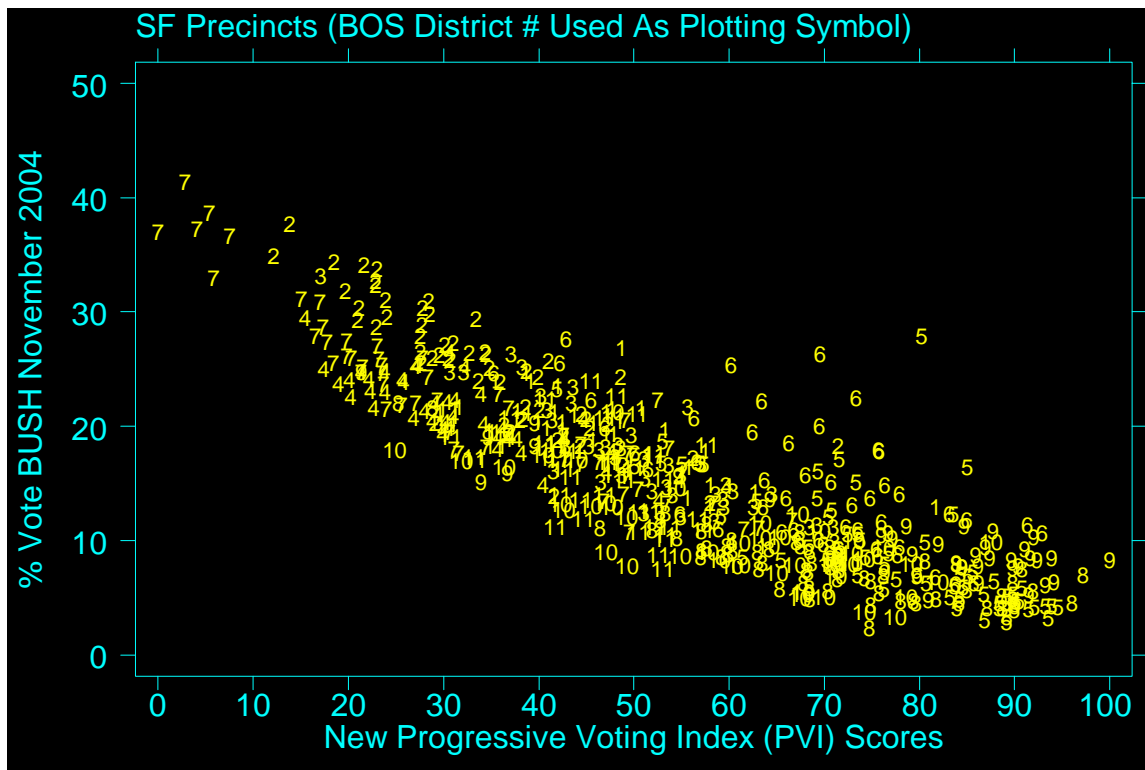

FIGURE 1A: Plot of precinct vote for BUSH for President (of total votes cast) in November 2004 versus precinct PVI scores. (Correlation: $r = -.87$)

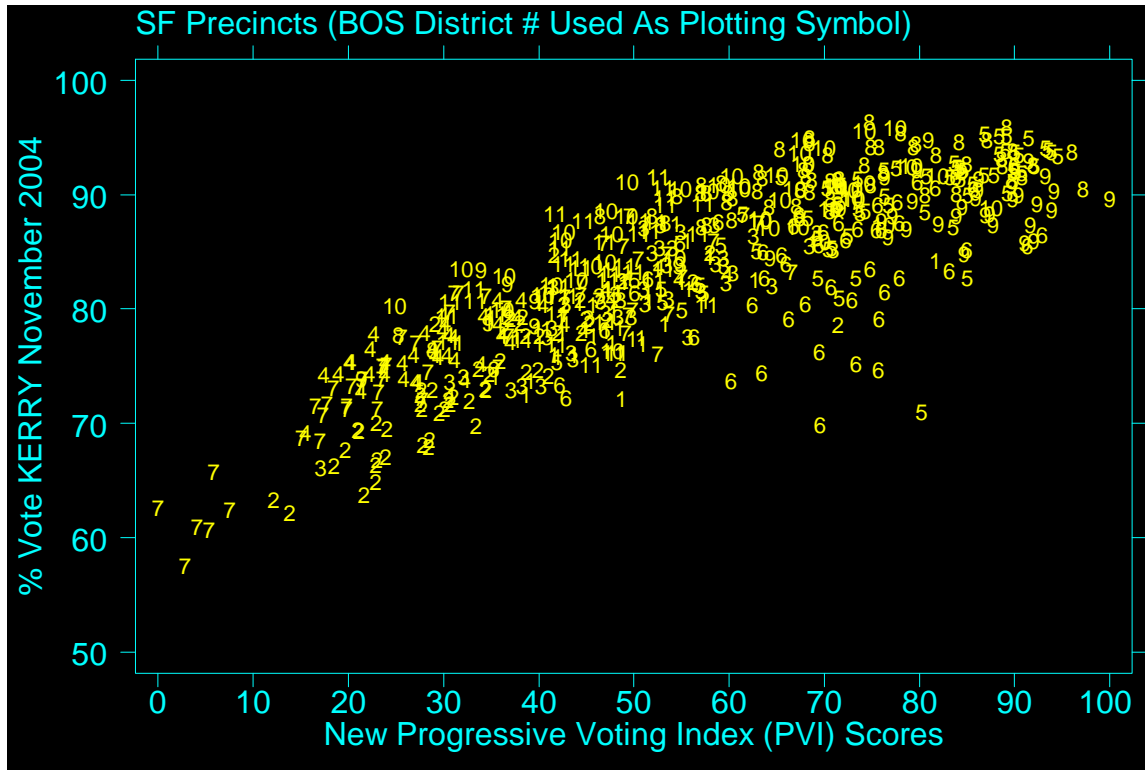

FIGURE 1B : Plot of precinct vote for **KERRY** for President (of total votes cast) in November 2004 versus precinct PVI scores. (Correlation: $r = +.84$)

STUDY #2: Precinct PVI scores as predictors of the December 2003 runoff vote for **Gavin Newsom** and **Matt Gonzalez** for Mayor of San Francisco

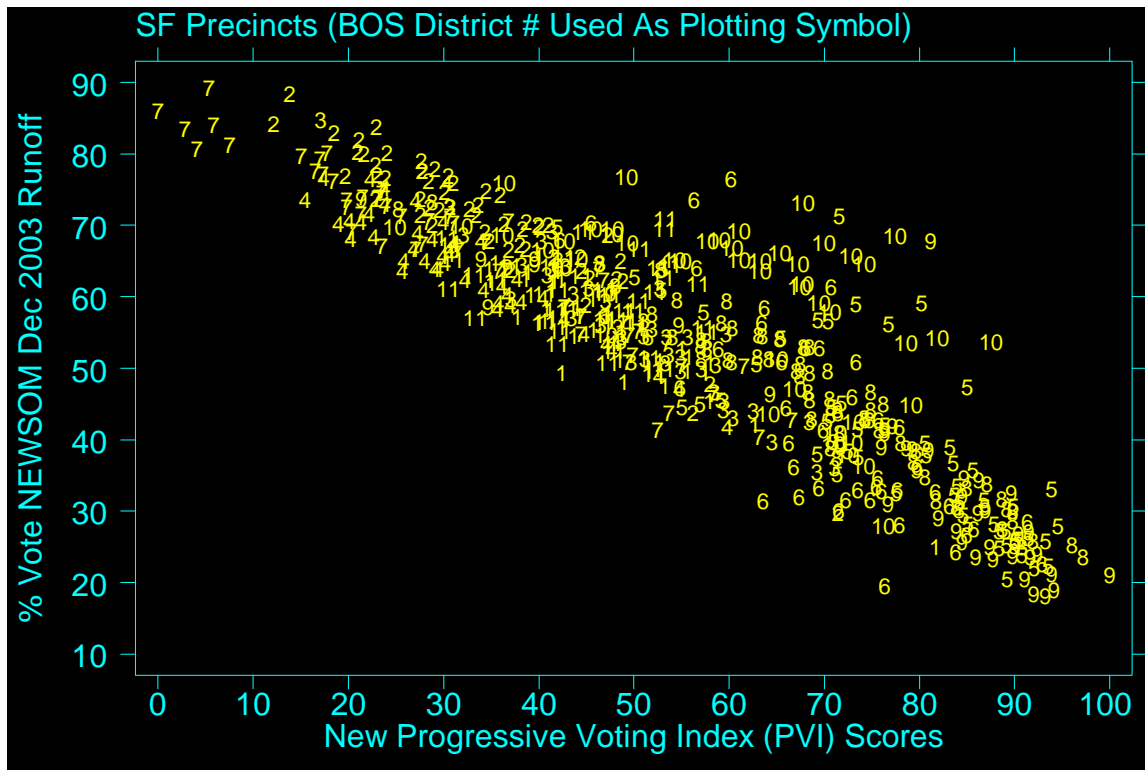

FIGURE 2A : Plot of precinct vote for NEWSOM for Mayor in December 2003 runoff versus precinct PVI scores. (Correlation: $r = -.89$)

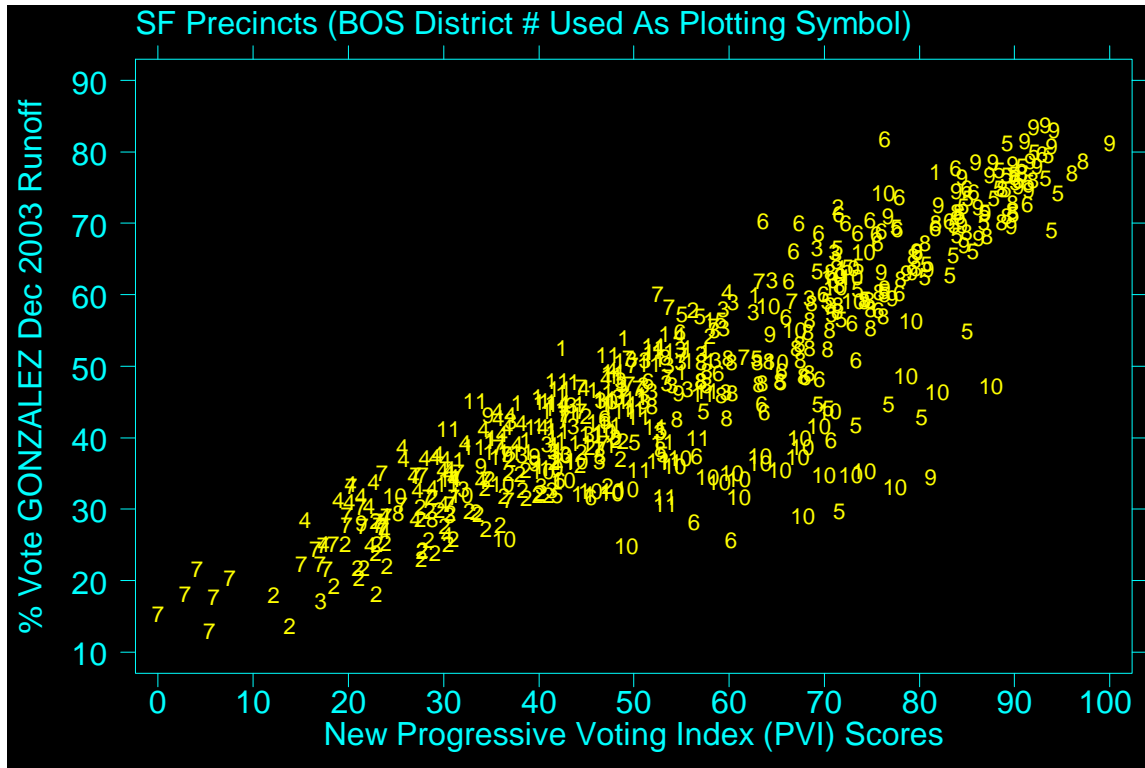

FIGURE 2B : Plot of precinct vote for GONZALEZ for Mayor in December 2003 runoff versus precinct PVI scores. (Correlation: $r = +.89$)

STUDY #3: Precinct PVI scores as predictors of total voter turnout, absentee voter turnout, and election day voter turnout in the November 2004 election.

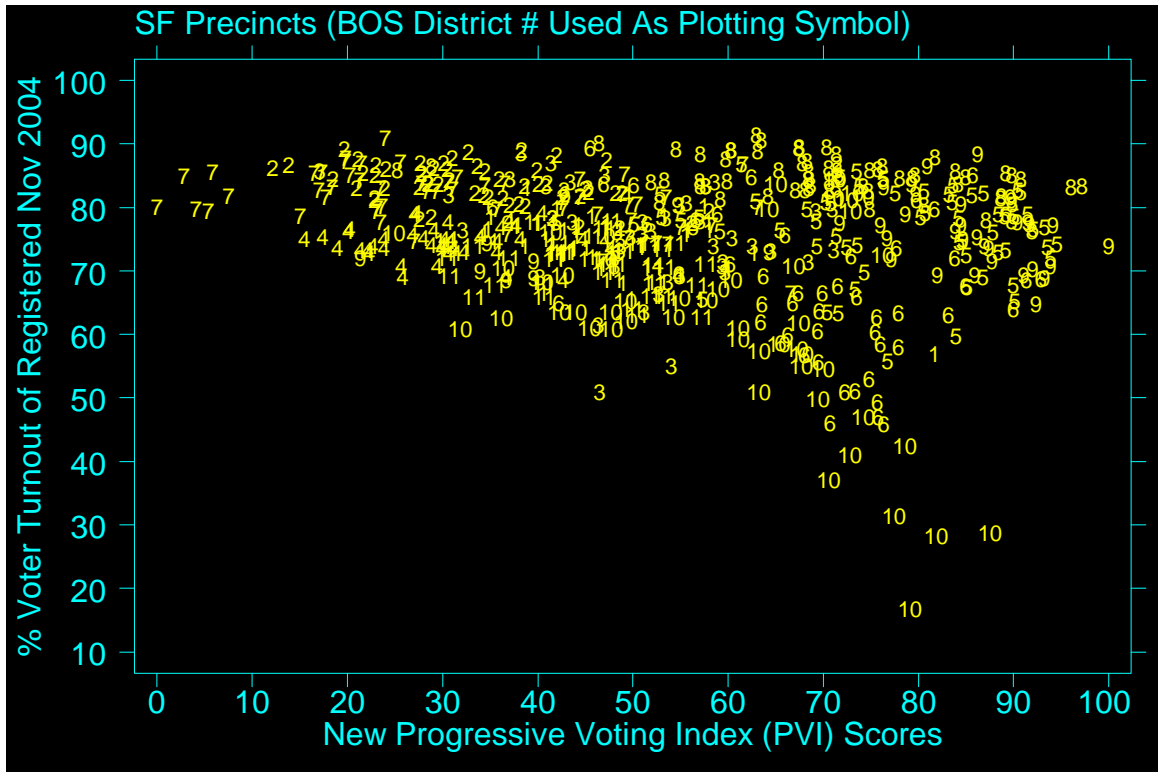

FIGURE 3A : Plot of precinct total voter turnout as a percent of registered in November 2004 versus precinct PVI scores. (Correlation: $r = -.21$)

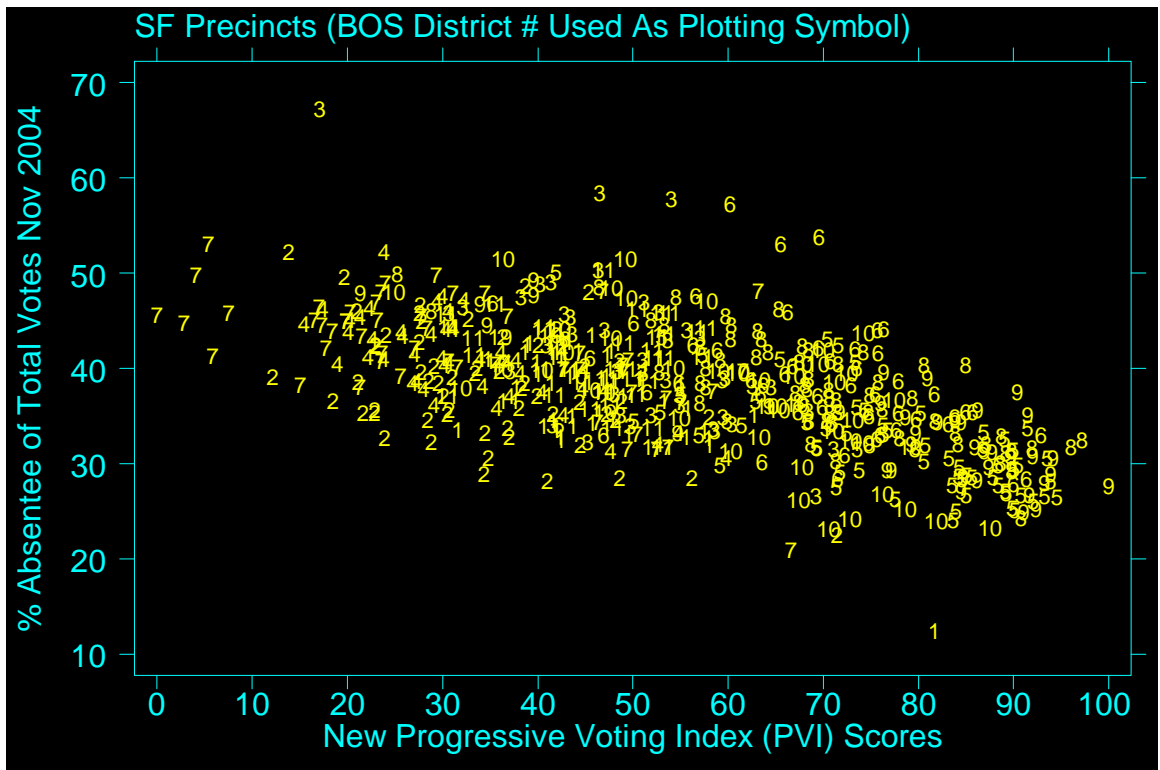

FIGURE 3B: Plot of precinct absentee vote as a percent of total votes cast in November 2004 versus precinct PVI scores. (Correlation: $r = -.61$)

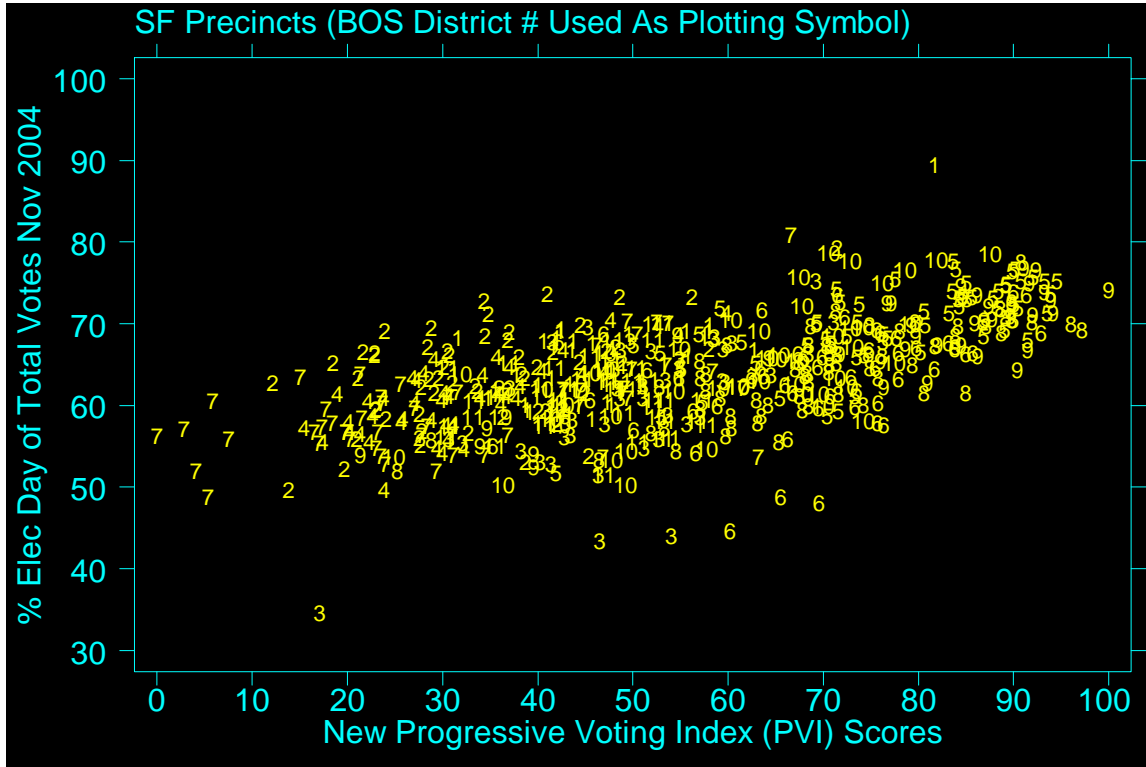

FIGURE 3C: Plot of precinct election day vote as a percent of total votes cast in November 2004 versus precinct PVI scores. (Correlation: $r = +.61$)
