**T**his is a win-win for San Francisco transit riders and taxpayers. By speeding up each line by just one minute – Muni will save \$20 million per year and help us get to work, school and home just a little faster.

**How do we do it?** There's already a plan sitting on Muni's shelf called the Transit Effectiveness Project that contains simple and low-cost ways to get Muni moving just a little faster: timing a few more lights, moving stops a few yards so they are after stop lights and not before, and adding a few more express routes. These are just a few of the ways we can go faster – and save money.
